

WINNICA TURNAU RONDO/REGENT 2023

WINE DESCRIPTION

Rondo/Regent 2023 is a blend of two red grape varieties. Their skins are rich in antioxidants, giving the wine a deep ruby hue. On the nose, it shows cherry aromas, complemented by smoky and leathery notes from oak barrel aging. On the palate, flavors of cherry and dark chocolate intertwine with a touch of cranberry-like acidity and pleasant tannins that elegantly highlight the character of this classic Rondo/Regent blend.

WINE AROMAS

cherry, oak, smoke

TASTE OF WINE

sweet cherry, cranberry, dark chocolate

FOODPAIRING

beef, cheese, game, grill

WINE PARAMETERS

residual sugar: 8,2 g/l

acidity: 6,3 g/l

alcohol content: 11,5

VINIFICATION

Maceration for 12 days on the skins. Aged for 12 months in Slavonian oak barrique barrels. The barrels were previously used.

AWARDS (ALL YEARS)

PIWI INTERNATIONAL 2024 - GOLD

AWC VIENNA 2024 - GOLD

TERROIR

Winnica Turnau is located in Baniewice, in the southwestern part of the West Pomeranian Voivodeship. This unique region is influenced by air masses from the Atlantic Ocean and the Baltic Sea, as well as the proximity of the Oder River. All these factors shape a climate characterized by a long growing season, warm summers, and mild winters. Such conditions favor the cultivation of demanding grape varieties, allowing them to reach optimal ripeness while maintaining high acidity. Our region is distinguished by a rich network of oxbow lakes, gently rolling moraine hills, and an abundance of flora and fauna. The vineyard is situated on a moraine hill, where the predominant soils are sandy-clay, clay, moderately compact, and moderately permeable. This terroir, combined with ecological viticulture, results in grapes of exceptionally high quality.

WEATHER DURING THE GROWING PERIOD

The winter of 2022/2023 was frosty with moderate snow cover. The beginning of spring was frosty, but vegetation started a little earlier than in recent years. May was cool but dry, frosts surprised at the beginning of June. Summer 2023 was very rainy, especially at the end of fruit ripening, which increased disease pressure and forced a large collective selection. The autumn was moderately warm, with heavy rainfall from the middle of the harvest. The harvest started on time.
