

WINNICA TURNAU PERLE ROSE 2024

WINE DESCRIPTION

Perle Rosé 2024 is a lightly sparkling blend of two red grape varieties - Rondo and Regent. Following low-temperature fermentation, the wine gained freshness and aromatic notes of red fruit. An intense cherry aroma introduces the strawberry sweetness on the palate. Completed by delicate pearling bubbles, the wine expresses a light yet flavor-rich style of off-dry rosé.

WINE AROMAS

flowers, cherry, sweet cherry

TASTE OF WINE

strawberry, sweet cherry, red apple

FOODPAIRING

fish, poultry, seafood, sushi, salads, grilled dishes

WINE PARAMETERS

residual sugar: 19,7 g/l

acidity: 6,5 g/l

alcohol content: 10,5%

GRAPE VARIETIES

rondo, regent

VINIFICATION

Fermentation in stainless steel tanks. Gentle addition of carbon dioxide in a pressure tank.

TERROIR

Winnica Turnau is located in Baniewice, in the southwestern part of the West Pomeranian Voivodeship. This unique region is influenced by air masses from the Atlantic Ocean and the Baltic Sea, as well as the proximity of the Oder River. All these factors shape a climate characterized by a long growing season, warm summers, and mild winters. Such conditions favor the cultivation of demanding grape varieties, allowing them to reach optimal ripeness while maintaining high acidity. Our region is distinguished by a rich network of oxbow lakes, gently rolling moraine hills, and an abundance of flora and fauna. The vineyard is situated on a moraine hill, where the predominant soils are sandy-clay, clay, moderately compact, and moderately permeable. This terroir, combined with ecological viticulture, results in grapes of exceptionally high quality.

WEATHER DURING THE GROWING PERIOD

Winter 2023/2024 was frosty, with little snow cover. The beginning of spring was quite warm, which allowed vegetation to start much earlier than in previous years. In April, there was a week-long frost with high negative temperatures, reaching even -8 degrees. May was quite warm and dry. July was the rainy. Harvest started earlier than usual (mid-August) and ended in early October.
